**Subject: Transportation Incident**

On Thursday, October 27, 2022, a third-party logistics carrier transporting an empty shipping container from our Vancouver, British Columbia operations to our Ottawa, Ontario operations was involved in a collision with a passenger vehicle. The occupants in the logistics carrier vehicle received minor injuries, whereas the occupants in the passenger vehicle received fatal injuries. We mourn the loss of life and are grateful that our supply chain contractor employees were not seriously injured.

There was no impact to the empty package and there was no health or safety risk posed to the public or the environment.
