## CNSC Annual Public Meeting

BWXT Nuclear Energy Canada (BWXT NEC) and other licensees will participate in a virtual public meeting on Dec. 16, 2022 held by Canada's nuclear regulator, the Canadian Nuclear Safety Commission (CNSC).

Each year, BWXT NEC submits an Annual Compliance Report (ACR) to the CNSC with the purpose of demonstrating that BWXT NEC has successfully met the requirements of the Nuclear Safety and Control Act for its Class IB Nuclear Fuel Facility Operating Licence. BWXT NEC's 2021 ACR can be found on our website at [nec.bwxt.com](http://nec.bwxt.com).

At the meeting, CNSC Staff will present their annual Regulatory Oversight Report. The Report is available on the CNSC's website at the following link: <https://www.nuclearsafety.gc.ca/eng/the-commission/meetings/cmd/pdf/CMD22/CMD22-M35.pdf>

For more information on this meeting, visit the CNSC's website at [nuclearsafety.gc.ca](http://nuclearsafety.gc.ca).

## Social Media

We use our social media channels as a way to connect with our communities in Peterborough, Toronto and Arnprior. Follow BWXT NEC on Twitter and Facebook for regular updates!

FOLLOW US ON

Thank you to those  
who participated in our  
public attitude survey.

The results will be posted to the  
Community page of our website in  
the coming months.

## DID YOU KNOW?

Did you know that over 60% of Ontario's electricity comes from nuclear power generation?

Also, when considering the entire power generation lifecycle, including construction, mining, operation and decommissioning, nuclear comes out as one of the cleanest technologies available. Learn more about how nuclear is ready to meet the climate change challenge by visiting the Canadian Nuclear Association's website at: [www.cna.ca](http://www.cna.ca)

# Join our Community Liaison Committee!

Local citizens and representatives of community organizations are invited to apply to BWXT NEC's Toronto Community Liaison Committee (CLC).

The CLC is a forum for the exchange of information between BWXT NEC and members of the community near our facility on 1025 Lansdowne Avenue, Toronto. BWXT NEC seeks to learn more about community priorities, interests and activities, improve how the company shares information about work at its Lansdowne Avenue facility, and share the company's health & safety initiatives and community activities.

CLC members convey questions, discuss concerns and identify opportunities to improve communications and community relations. During the pandemic, our CLC has continued to meet via virtual meetings.

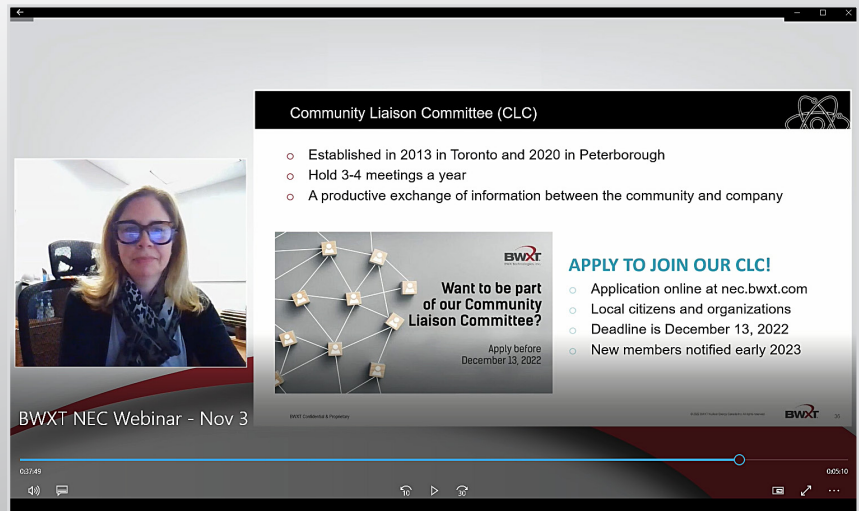

**APPLY NOW!** The application is available on our website at [nec.bwxt.com](http://nec.bwxt.com) and can be returned via mail or email. The deadline to apply for the CLC is **December 13, 2022** and new members will be notified in early 2023.

## Community Webinar

This year, we cancelled our annual summer community BBQ due to the pandemic. This was a difficult decision for the BWXT NEC team, as we look forward to this important community event each year.

The annual community BBQ gives our team the opportunity to meet with our neighbours to answer questions and address concerns.

In lieu of the BBQ, we held a Community Webinar on November 3rd. For those who missed the webinar and would like to watch a recording, visit our website at [nec.bwxt.com](http://nec.bwxt.com).

## About BWXT NEC in Toronto

In Toronto, we manufacture ceramic pellets from natural uranium dioxide powder. After pressing, baking, grinding and inspecting the pellets, we send them to our Peterborough facility where they are placed in CANDU® fuel bundles. The fuel bundles are then sent to Ontario Power Generation's Darlington and Pickering Nuclear Generating Stations. Both our Peterborough and Toronto facilities are licensed by Canada's nuclear regulator, the Canadian Nuclear Safety Commission (CNSC).

Approximately 50 people work for BWXT in Toronto in high-value manufacturing positions, engineering, and operations support. This team produces the fuel to power 1 in 4 homes and businesses in Ontario with greenhouse gas emissions-free, affordable electricity!
