

False Alarm at Toronto Facility

On Friday, January 15, 2016 at approximately 10 a.m. a fire alarm was triggered at BWXT's Toronto plant as a result of the building's elevator approaching its weight limit capacity. Toronto Fire Services responded to the alarm and verified to GEH-C environmental health and safety staff who were onsite that the incident was a false alarm and that there was no fire. All procedures were executed according to BWXT's emergency response plan.

There was no health or safety risk posed to the public or employees.
