

False Alarm at Toronto Facility

On Wednesday, December 23, 2015 at approximately 10 a.m. a fire alarm was triggered at BWXT's Toronto plant as a result of work being performed on the building's elevator. Toronto Fire Services responded to the alarm and verified to BWXT environmental health and safety staff who were onsite that the incident was a false alarm and that there was no fire. There is currently no production occurring at the plant due to the annual holiday shutdown but office staff was onsite. All procedures were executed according to BWXT's emergency response plan.

There was no health or safety risk posed to the public or employees.
