The successful closing of radioactive waste tanks are just part of Savannah River Remediation’s responsibilities at the Savannah River Site.
Subsidiaries and Locations

Savannah River Remediation, LLC (Aiken, SC)

Savannah River Site (SRS)

▪ Advancing SRS’s environmental management mission to safely treat, store and dispose of radioactive liquid waste as part of the team since 1996
▪ Responsible for closure of non-compliant waste tanks; operating the site’s Defense Waste Processing Facility and salt processing facilities, including the Saltstone production and disposal facilities; and managing tank farm operations necessary to support site missions
▪ Key DOE industrial complex dedicated to processing and storing nuclear materials in support of national defense and U.S. nuclear nonproliferation efforts

Commercial Nuclear Success

▪ Designed and supplied three pressurized water reactors at a nuclear station in South Carolina
▪ Fabricated six replacement once-through steam generators and three reactor vessel closure heads
▪ 13 steam generator inspection service outages completed, on schedule and under dose
▪ Top Industry Practice (TIP) Award for the utility by Nuclear Energy Institute

SRR provides many skilled and trade labor opportunities for the local area

At BWX Technologies, Inc. (NYSE: BWXT), we are People Strong, Innovation Driven. Headquartered in Lynchburg, Va., BWXT provides safe and effective nuclear solutions for national security, clean energy, environmental remediation, nuclear medicine and space exploration. With approximately 6,600 employees, BWXT has 12 major operating sites in the U.S. and Canada. In addition, BWXT joint ventures provide management and operations at more than a dozen U.S. Department of Energy and NASA facilities.
