International Mentoring Workshop

BWXT was a proud sponsor of the 2023 International Mentoring Workshop, a four-day workshop organized by the Organization for Economic Co-operation Development (OECD) and the Nuclear Energy Agency (NEA) in partnership with the Canadian Nuclear Safety Commission (CNSC) and Trent University.

We welcomed more than 50 grade nine Indigenous students to our Peterborough site for a presentation on the science and benefits of nuclear energy, and for a tour of our fuel fabrication facility.

Students watching a demonstration at our facility in Peterborough.

Happy National Indigenous History Month

National Indigenous History Month is a time to recognize the rich tapestry of Indigenous histories, cultures, and achievements.

This June, BWXT joins millions of Canadians in celebrating Indigenous voices and learning more about First Nations, Inuit and Métis communities across Canada.

Annual Compliance Report Now Available

Each year, BWXT Nuclear Energy Canada submits an Annual Compliance Report to the Canadian Nuclear Safety Commission (CNSC) to demonstrate that we have met the necessary regulatory requirements.

The 2022 Annual Compliance Report is now available and can be accessed on our website here:

www.nec.bwxt.com/safety/our-compliance-record

BWXT Xtreme Paddlers Raise Funds for PRHC Breast Assessment Centre

The BWXT Xtreme Paddlers recently competed at the annual Peterborough Dragon Boat Festival, where they raised more than \$1,000 for the Breast Assessment Centre (BAC) at the Peterborough Regional Health Centre.

The BAC is home to the Ontario Breast Screening Program and offers a coordinated approach to the assessment and diagnosis of breast health concerns.

Thank you, BWXT Xtreme Paddlers, for volunteering your time to raise funds and awareness about this important community health service.

About BWXT NEC in Peterborough

In Peterborough, we assemble CANDU® fuel bundles using natural uranium dioxide ceramic pellets from our Toronto facility and zircaloy tubes from our Amprior facility. The fuel bundles are then sent to Ontario Power Generation's Darlington and Pickering Nuclear Generating Stations. Both our Peterborough and Toronto facilities are licensed by Canada's nuclear regulator, the Canadian Nuclear Safety Commission (CNSC).

Approximately 400 people work at BWXT in Peterborough in high-tech, manufacturing and administrative positions (180 are engineers in disciplines such as software, metallurgy, mechanical, electrical and systems). This team produces the fuel to power 1 in 4 homes and businesses in Ontario with greenhouse gas emissions-free, affordable electricity.

**Interested in joining the BWXT team?
We're hiring!**
