

Environmental Health and Safety Policy

Purpose

To set forth BWX Technologies' commitment to conduct its business in a safe and an environmentally responsible manner and to establish responsibilities, authority and accountability for the implementation of this commitment.

Applies to

BWX Technologies (BWXT) its operating groups, subsidiaries, and affiliated companies (the "Company").

Policy

The Company is committed to the safety of its employees and minimizing the impact of its activities on the environment. This Policy is informed and guided by the Company's Vision, Mission and Core Values. In that collective effort, we shall strive to adhere to the following:

- Design, construct, operate and decommission business activities safely and with minimal impact to the environment.
- Maintain risks to employees and the environment as low as reasonably achievable.
- Promote the prevention of pollution to the environment in all aspects of our business.
- Minimize waste and maximize reuse and recycling opportunities throughout our business.
- Fully comply with all applicable federal, state and local laws, rules and regulations.
- Educate our employees and contractors to increase awareness and commitment such that safety and environmental considerations become a natural part of our decision-making process.
- Continually seek to maximize energy conservation and the efficient use of natural resources.
- Utilize our continuous improvement culture to routinely seek opportunities to improve our safety and minimize our environmental impacts.
